

RMI 141 and RMI 141H

HIGH CONTRAST RESOLUTION TEST TOOLS

RMI 141 AND RMI 141H

One important measure of your fluoroscopy system is its high contrast resolution. This test can access the resolving power of your system and can be accomplished easily with GAMMEX RMI test tools.

RMI 141 and RMI 141H consist of eight patterns of copper wire mesh in a pie shape. Each is labeled with lead numbers for easy visualization.

RMI 141 is used for standard radiographic systems with resolutions between 16 and 60 mesh. RMI 141H is used for systems with high resolution such as those used in cardiology suites, where resolution is between 60 and 150 mesh.

SPECIFICATIONS

RMI 141

Geometric Progression.....	2 1/3
Construction.....	White Plastic (outside)
Eight Wire Mesh Patterns (inside)	
.....	16 to 60 mesh
Dimensions	18x18x1 cm (7x7x0.4 in.)
Weight	113 g (4 oz.)

RMI 141H

Geometric Progression	2 1/3
Construction.....	White Plastic (outside)
Eight Wire Mesh Patterns (inside)	
.....	60 to 150 mesh
Dimensions	18x18x1 cm (7x7x0.4 in.)
Weight	113 g (4 oz.)
